

Deniz Erkan

Mechanical Engineer / Junior Developer

✉ denizerkan1984@gmail.com 📞 +905055934235 📍 Ankara/TURKEY

Profile

After a short period of study in the field I graduated from, I decided to focus on programming. I focused on Python and C# programming languages and I am still developing projects in these languages. My goal is to work in areas where I can actively use my mechanical engineering knowledge. However, I worked efficiently in other areas as well such as web developing and i enjoyed all of them. Moreover, I am still developing myself in the fields of data engineering and machine learning . I'm working on obtaining certificates on those areas. Although i had interruptions in my business life and not actually working in any company in recent years, i am a hardworking, determined person who is prone to group work and cares about communication. Thank you for your interest in my resume, have a nice day.

Education

Mechanical Engineering 08/2012
Çukurova University, Adana
